

Letter of Reference For R-Value Concrete Structures

Written by: Adam Bearup, Owner of Hybrid Homes, LLC

Date: 10-09-08

To Whom It May Concern:

R-Value Concrete Structures is Hybrid Homes, LLC's ICF installer of choice. After a long search, I found Jake and R-Value and immediately hired their services. I have been in the ICF business, building residential homes since my dad owned a company in the early 1990's. I hired Jake once I met him and saw his work, because he is the only other installer that I trust to install ICFs in the State of Michigan.

As a Team Hybrid Member, R-Value Concrete Structures has helped my company reach new heights. They were the ICF installers on our Onekama Project, which was recently awarded two National ICF Awards. The Insulated Concrete Form Association awarded Hybrid Homes two excellence awards, one for top residential ICF project in North America (over 3,000 square feet) and one for the top sustainable award in North America (residential and commercial). With R-Values help, we continue to grow in times that are very tough. I contribute our growth to having the best, highest quality, efficient, and ethical team members like R-Value Concrete Structures, LLC.

I would not hesitate to hire R-Value Concrete Structures again, in-fact, they are our ICF installers for all of our up-coming jobs, I would recommend anyone looking at building with ICFs to hire them. The proof is in their quality and workmanship.

Sincerely,

Adam Bearup
